Is It a Pumpkin or a Gourd, or Both Perhaps?

Justin was given a problem to solve. He was shown three boxes labeled “Gourds”, “Small Pumpkins”, “Gourds and Small Pumpkins”. Each box was incorrectly labeled. Justin was allowed to take one item out of one of the boxes. He could not peek inside any box or feel around inside any box. How can Justin label each box correctly given these rules? **Be specific in your answer and explanation.**

You must include the answer and explanation including the process Justin used to determine how each box needed to be labeled. **Answers without proper explanations will be considered incorrect!** Did you know that the human heart beats 100,000 times a day!

Have fun today and keep looking up –Dr. Fraccaro
