SystemGuard® provides maximum peace-of-mind protection.

Even with the EasyGuard® protections built into our Portégé® and Tecra® laptops, accidents happen. Which is why Toshiba offers SystemGuard—an additional low-cost layer of protection for repairing damage due to spills, drops and other mishaps that may occur no matter how careful you are.

SystemGuard gives you:

• **Accidental Damage Coverage**: Our trained technicians will fix accidental damage or replace the product if it can’t be repaired.
• **Surge Protection**: Power spikes occur with alarming regularity. And when they do, SystemGuard covers accidental damage.
• **Repair Options**: SystemGuard offers two repair options:
  - Carry-in service through a Toshiba Authorized Service Provider (ASP)
  - Mail-In Depot repair (send the machine to a Toshiba service center)
• **Combination Coverage**: SystemGuard can be combined with other Toshiba service offerings—like ServiceExpress or On-Site Service—for complete coverage of the laptop.

Here’s how SystemGuard works:

• Available on all new Toshiba laptops
• Covers accidental damage up to the purchase price of the laptops
• Must be purchased within the first 30 days of the original laptop sale
• SystemGuard coverage begins on the date the laptop was purchased
• Can be combined with ServiceExpress, plus On-Site Repair

Choose the SystemGuard option that’s right for you:

• WSN-PEGQ4V – 4 Year SystemGuard +2nd/3rd/4th Year Extended Service Plan
• WSN-PTGQ4V – 4 Year SystemGuard + 4th Year Extended Service Plan

Don’t wait for accidents to happen. Choose SystemGuard®. See your Toshiba Education Reseller for pricing and more details.
